

Pitch Deck

SAF Connect

Connecting Care with Technology

Brief Introduction

- SAF Connect is a healthcare technology startup that provides a comprehensive platform for hospitals and clinics to manage their resources efficiently and offers real-time tracking and online booking for critical medical facilities.
- **Key Facts:**
 - > Focuses on bridging the gap in real-time patient information and optimizing resource management for healthcare providers.:
- **Current Status:**
 - > SAF Connect is in the early stages with initial market research indicating strong interest from hospitals in adopting a unified management solution. No traction has been achieved yet, but significant groundwork has been established to validate the product concept.

Problem Statement

- The problem that we identified as worth solving is the lack of real-time information on critical hospital resources, which makes it difficult for patients and their families to access up-to-date details on the availability of ICU beds, ventilators, and child nursery facilities.
- Lack of resource management in hospitals, clinics, and doctors' offices leads to inefficiencies, data loss, increased operational costs
- We found that approximately 80% of the customers that we interviewed are facing this problem.
- Currently, they are managing this problem by using outdated systems, manual record-keeping, and fragmented tools

Solution

1

Integration of hospital, clinic, and doctor into a single, easy-to-use system

2

Real-time tracking system

3

Advanced tools for tracking and optimizing the utilization of resources

Persona- Doctor's

FRUSTRATIONS

- Time-consuming manual patient record management
- Difficulty tracking hospital resources
- Inconsistent communication between departments, causing care delays

NEEDS

- Streamlined patient management and scheduling
- Real-time tracking of beds and ICU availability
- Enhanced communication for seamless departmental collaboration

GOALS

- Deliver quality care without administrative burden
- Easily manage records for better diagnosis
- Streamlined appointments to reduce no-shows

HOW OUR PLATFORM HELPS ?

- Unified platform for patient management, resource tracking, and scheduling
- Real-time hospital resource updates to prevent care delays
- Streamlined communication and documentation, reducing admin tasks.

SARAH

Age: 33 Location:
Mumbai

Occupation:
Marketing
Manager Tech-
Savvy Level:
Moderate

Persona– Patient

HEALTH CONCERNS:

- Chronic asthma requiring regular check-ups and specialist visits
- Stress-induced migraines with a focus on preventive care

FRUSTRATIONS:

- Long hospital wait times and difficulty finding specialists
- Uncertainty about available hospital services

HOW OUR PLATFORM HELPS ?

- Centralized access to hospitals with real-time updates on doctor availability and ICU beds
- Instant appointment scheduling and reminders

GOALS:

- Manage health and chronic conditions without work disruptions
- Easily access doctors for advice and appointments

NEEDS:

- Real-time medical services and availability
- Quick access to specialists and facilities

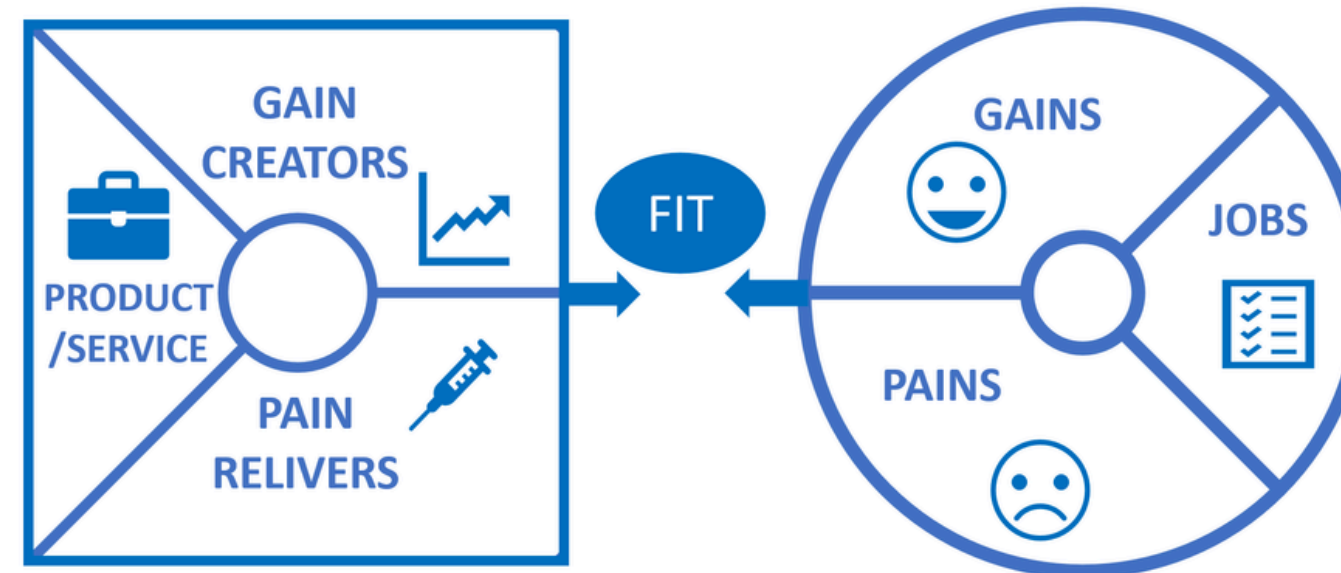

- Secure digital health records accessible anytime
- Reduced wait times through optimized hospital management

Value Proposition Canvas – Doctors

- Online appointment booking, cancellation, payment & refund
- Doctor availability and last minute changes notified to patients

- Freedom from unending calls
- Elimination of long waiting lines and overcrowding in the hospital

- HMS Platform with Patient & staff Management
- Patient-Hospital Connectivity with appointment booking, and payment portal
- Data Management and Analytics with AI integration

- Platform to manage patient appointments, payments, resources, and doctor availability
- Advertise the key facilities they provide and bring in relevant traffic

- Cost-effective & easy-to use platform, no training needed to operate
- Subscription plans provide pay for what you use facility

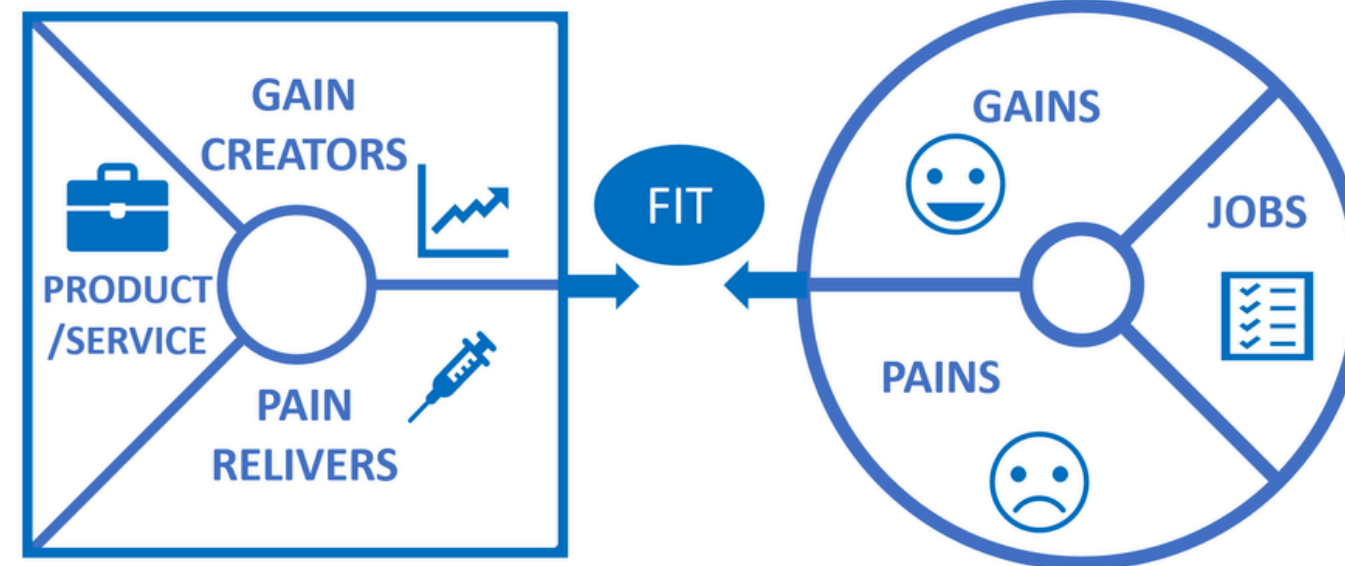

- The EMR and HMS software available are very complicated to be used by the staff
- They are expensive with the added cost of hiring a technical employee to use that

Value Proposition Canvas – Patients

- A digital notice board to receive information from the hospitals of the occurring issues, to prevent wasteful journeys

- A platform through which hospitals can convey information to patients
- Information of the field of expertise of all the doctors should be visible to all to make informed decisions

- Platform to find, locate and connect to various HSPs with appointment booking, and payment portal
- It offers details of doctors, ICU beds, ventilators, lab tests etc and also lets the user to compare

- Find the best suitable health service provider
- Book appointments and ambulance services instantly
- Know about the availability of ICU beds, ventilators and rare tests
- Compare the cost of the services

- Availability of critical hospital resources is updated regularly so that no patient is turned back
- All details of the hospitals and its staff are available for all see

- Many Hospitals have the required facilities, but are often occupied, forcing patients to go place to place in search
- A lot of time is wasted in calling various hosp and repetitive inquiry

LEAN CANVAS – HEALTH SERVICE PROVIDERS/DOCTORS

Problem - No real-time info on hospital resources - Disconnected resource management systems - High administrative workload - No AI integration - Poor patient outreach Existing Alternatives - Multiple HMS - Various EMRs - Handwritten records - Social media apps	Solution - SAF Connect: An HMS platform with UI/UX optimization - Features: Data management, analytics, appointment booking, and payment portal - Benefits: Brand building and customer base expansion	Unique Value Proposition - Seamless patient-hospital connectivity - Efficient patient management - AI-powered and easily accessible High-Level Concept - Flipkart for the healthcare sector	Unfair Advantage - High concentration of hospitals near target groups - Abundant medical support facilities (labs, pharmacies, 24/7 ambulances) - Dedicated team of talented coders passionate about community service	Customer Segments - Hospitals: Large and small seeking comprehensive management solutions and promotion - Clinics: Small to medium-sized needing a cost-effective platform for appointments and resources - Doctors: Medical practitioners aiming to manage their practices efficiently Early Adopters - Nearby hospitals and clinics
	Key Metrics - Number of HSP subscriptions - Appointments booked - Customer support requests (minimal)		Channels - Mobile ads and social media - Website SEO, content, and email marketing - Direct sales and marketing - Referral programs	
Cost Structure - App development, maintenance, and hosting - Infrastructure and operational costs - Marketing and advertising - Training and adoption			Revenue Streams - Subscription plans: Platinum, Gold, and Silver - Paid features - Paid partnerships	

09

LEAN CANVAS – PATIENTS

PROBLEM - Lack of up-to-date details on the availability of ICU beds, ventilators etc. - Lack of information on the OPD/OT days of doctors - Lack of a platform to access and compare services from various health service providers - Lack of an app to Book & cancel appointments, pay & take refunds EXISTING ALTERNATIVES - Word of mouth - Repetitive calling - In-person visits - Social media groups	SOLUTION - SAF connect is an app on which one can find, locate and connect to various HSPs - It offers details of doctors, ICU beds, ventilators, lab tests etc and also lets the user compare the cost and details - It also has a portal to book appointments and make payments	UNIQUE VALUE PROPOSITION - SAF connect has a unique mix of features which help to search and narrow down choices in the highly indecisive healthcare market - One can see all the services that a facility has to offer on a single page HIGH-LEVEL CONCEPT - Flipkart of health sector	UNFAIR ADVANTAGE - Dense distribution of Hospitals in nearby areas with target groups in high concentration - Dense distribution of medical support facilities like labs, pharmacies and 24/7 ambulance services - A Team of talented coders passionate about serving the community	CUSTOMER SEGMENTS - Patients who are searching for the best place to go for treatment - Patients who need urgent help - Patients who are budget conscious and would want to compare the costs - Patients who are concerned with the expertise of the doctor - People who want to be aware of the facilities around them in case of an emergency EARLY ADOPTERS - Tech aware Patients wanting to get the best treatment for the best price
	KEY METRICS - No of visitors - No of appointments booked - Satisfaction ratings - Value of transactions done		CHANNELS - Mobile Ads, Social Media - Website SEO, Content & Email Marketing - Direct Sales, Marketing - Referral programs	
COST STRUCTURE - App development, maintenance and hosting - Infrastructure and Operational Costs - Marketing and Advertisement - Training and adoption			REVENUE STREAMS - Mobile Ads - Sponsored content - Share of the appointment payment

SAF Connect

Hello! I'm SAFConnect. How can I assist you today?

I've been having severe headaches and dizziness for a week.

I'm sorry to hear that. Persistent headaches and dizziness require medical attention. I recommend visiting a healthcare facility as soon as possible. Here are some nearby clinics you can visit:

City General Hospital

SAF Connect

medical attention. I recommend visiting a healthcare facility as soon as possible. Here are some nearby clinics you can visit:

City General Hospital
Address: 123 Main St, City Center
Phone: 555-1234

Westside Urgent Care
Address: 456 Oak Ave, West End
Phone: 555-5678

Eastside Medical Center
Address: 789 Elm St, East Side

SAF Connect

Phone: 555-5678

Eastside Medical Center
Address: 789 Elm St, East Side
Phone: 555-9012

Is there anything I should do before going to the doctor?

Stay hydrated and avoid sudden movements. Please go to one of these healthcare facilities promptly. They can properly evaluate your symptoms and provide appropriate care.

Go-to-Market Strategy

Go-To-Market Strategy	Description	Execution Process
Target Market	Healthcare Providers (hospitals, clinics, doctors) & Patients	Research healthcare needs in areas with many healthcare providers. Focus on highlighting how your solution saves time and improves efficiency in marketing campaigns.
Market Segmentation	Healthcare Providers: Focus on resource management, scheduling, and patient handling. Patients: Emphasize ease of booking and real-time facility tracking.	Create targeted campaigns for providers and patients, using niche content and segmented messaging
Value Proposition	Healthcare Providers: Streamline resource and patient management. Patients: Access real-time facility data and easy appointment booking.	Promote success stories and case studies showcasing platform benefits.
Unique Selling Points (USPs)	- Real-time resource tracking - Appointment & payment management - Data analytics for providers	Highlight key features via demos, videos, and social media content. Use educational webinars to attract users.
Marketing Channels	- Social Media Ads - SEO & Content Marketing - Email & Referral Programs	Run digital ad campaigns, optimize for healthcare SEO, and share targeted case studies via email and blogs
Sales and Distribution	- Online subscription model - Direct sales to providers	Create a user-friendly website for sign-ups. Offer tiered subscriptions with free trials and demos.
